originally published in 1947 this book was written to provide an introductory survey of the developments in electromagnetic waves

although the propagation of electromagnetic waves in metal tubes wave guides had been studied for over fifty years prior to the publication of this book the subject was primarily of theoretical interest the treatment in this book reflects the movement away from the theoretical to a more practical interest in waves during the war with the development of the first micro wave radar equipment in 1940 1 the first six chapters are based on courses on microwave techniques which were given during the war at the radar school of the telecommunications research establishment whilst chapter seven is a mathematical treatment of the subject this book will be of great value to scholars of the history of physics and electromagnetics

this book discovers peer reviewed research from an international research conference that unites experts in software engineering data science artificial intelligence cybernetics and informatics this book presents cutting edge methods practical case studies and foundational advances that address real world challenges across the computational spectrum whether you seek rigorous theory proven development practices or visionary perspectives on emerging technologies this book provides a comprehensive resource for researchers practitioners and students committed to shaping the future of digital systems

an easy to read manual on how older persons with visual impairments can pursue their interests and activities in community residences senior centers long term care facilities and other settings topics covered include signs of vision loss recreation personal care orientation and mobility and modifications in the environment

this book discusses the design of the new mobility assistive information and communication technologies ict devices for the visually impaired the book begins with a definition of the space concept followed by the concept of interaction with a space during mobility and this interaction characteristics the contributors will then examine the neuro cognitive basis of space perception for mobility and different theories of space perception the text presents the existing technologies for space perception sense recovery with stem and ips cells implants brain plasticity sensory substitution devices multi modal technologies etc the newest technologies for mobility assistance design the way the feedback on environment is conveyed to the end user methods for formative and summative evaluations of the mobility devices will also be discussed the book concludes with a look to the future trends in research and technology development for mobility assistive information and communication technologies

the igisol group at the university of jyväskylä studies the properties of nuclei far off the line of beta stability these studies are performed locally at the jyväskylä ion guide isotope separator on line igisol facility as well as at a number of other laboratories such as

the isolde facility in cern at ganil and in helmholzzentrum gsi the location of the future radioactive beam facility fair the group is also actively involved in work to support the development of international future facilities eurisol and aforementioned fair this book presents carefully selected papers to portrahit the work at igisol previously published in the journals hyperfine interactions and european physical journal a
