this book constitutes the thoroughly refereed post conference proceedings of the 12th brazilian

symposium on formal methods sbmf 2009 held in gramado brazil in august 2009 co located with sast 2009 the brazilian workshop on systematic and automated software testing the 20 revised full papers presented together with 3 invited papers were carefully selected from numerous submissions during two rounds of reviewing and improvement the papers are devoted to the dissemination of the development and use of formal methods for the design and verification of computational systems the symposium provided an opportunity for researchers with a broad range of interests in formal methods for developing computing systems and software to discuss recent developments in this field

this updated text takes account of the changes that have occurred through technological advances and has sections to cover ict in the classroom it is suitable for both new and experienced teachers in primary further and higher education

in our digital age we can communicate access create and share an abundance of information effortlessly rapidly and nearly ubiquitously the consequence of having so many choices is that they compete for our attention we continually switch our attention between different types of information while doing different types of tasks in other words we multitask the activity of information workers in particular is characterized by the continual switching of attention throughout the day in this book empirical work is presented based on ethnographic and sensor data collection which reveals how multitasking affects information workers activities mood and stress in real work environments multitasking is discussed from various perspectives activity switching interruptions as triggers for activity switching email as a major source of interruptions and the converse of distractions focused attention all of these factors are components of information work this book begins by defining multitasking and describing different research approaches used in studying multitasking it then describes how multiple factors occur to encourage multitasking in the digitally enabled workplace the abundance and ease of accessing information the number of different working spheres the workplace environment attentional state habit and social norms empirical work is presented describing the nature of multitasking the relationship of different types of interruptions and email with overload and stress and patterns of attention focus the final chapter ties these factors together and discusses challenges that information workers in our digital age face

this book covers ehlers danlos and hypermobility syndromes with an emphasis on treatment of the parasympathetic and sympathetic p s nervous system dysfunctions unfortunately most eds hsd patients have been misdiagnosed and misunderstood by providers eds hsd is a multisystem multifaceted disorder that is poorly understood the p s manifestations and treatments are also poorly understood throughout the healthcare community to this end the authors wish to teach providers and patients alike to reduce the life long suffering from both the disorder and the marginalization there are two aspects of teaching that are required and provided by this book improved understanding of eds hsd and improved understanding of p s autonomic dysfunction and treatment for example with the autonomic nervous system more treatment or therapy is never better relief of p s dysfunction must be low and slow to prevent causing more symptoms from higher doses of medication or polypharmacy to this end stress often sets patients back and both providers and patients alike must have proper

expectations set for successfully improving patient outcomes quality of life and productivity the book starts with an introduction to and history of the disorder chapter ii provides a review of the genetics of collagen the source of the disorders chapters iii through ix detail the various forms of eds hsd and goes into more detail on the more common and more well known variants of eds hsd chapter x discusses structural cardiovascular and pulmonary dysfunction associated with eds hsd chapter xi discusses structural gastrointestinal and urogenital dysfunction associated with eds hsd the book ends with chapter xii which details the involvement of the p s nervous systems and how to treat which also has general application to other chronic disorders this is an ideal guide for rheumatologists and primary care physicians treating patients with ehlers danlos and hypermobility syndromes and patients and their loved ones in understanding their disease and disorders and the associated treatments and therapies

multitasking refers to performance of multiple tasks the most prominent types of multitasking are situations including either temporal overlap of the execution of multiple tasks i e dual tasking or executing multiple tasks in varying sequences i e task switching in the literature numerous attempts have aimed at theorizing about the specific characteristics of executive functions that control interference between simultaneously and or sequentially active component of task sets in these situations however these approaches have been rather vague regarding explanatory concepts e g task set inhibition preparation shielding capacity limitation widely lacking theories on detailed mechanisms and or empirical evidence for specific subcomponents the present research topic aims at providing a selection of contributions on the details of executive functioning in dual task and task switching situations the contributions specify these executive functions by focusing on 1 fractionating assumed mechanisms into constituent subcomponents 2 their variations by age or in clinical subpopulations and or 3 their plasticity as a response to practice and training
